

PRODUCT DATA

TYPICAL APPLICATIONS

- ✓ Open Air Acoustics
- ✓ Dynamic Drive Testing

FEATURES

- ✓ ¼" (7mm) mounting ring
- ✓ Windscreen
- ✓ Dust Protection
- ✓ Dirt Protection
- ✓ Spray water (light rain) protection
- ✓ Trickle water stop

CONSTRUCTION

The SWS-7 microphone protector is designed to protect your measurement microphone from harmful conditions with minimized influence of the sound field.

The microphone protector consists of a metal grid covered from impregnated acoustic permeable foam and a mounting ring with O-ring inside.

The mounting ring together with the O-ring make it stay on the microphone body and keeps off trickle water draining from the microphone body to the microphone port.

The foam covered grid drains spraying water from the microphone front. The protection is good for limited amounts of water, dust and dirt. It cannot protect from heavy rain conditions.

Acoustically permeable foam cannot protect from water in total.
